

Interpeak Identified as Fortieth Fastest-Growing Technology Company in Europe, the Middle East and Africa

Stockholm, Sweden [January 4, 2006] – Interpeak, a pioneer of Internet and secure networking software for embedded systems, has been recognized as the fortieth fastest-growing technology company in Europe, the Middle East and Africa by Deloitte Touche Tohmatsu (DTT) in its annual Technology Fast 500 Europe, the Middle East and Africa (EMEA).

The Technology Fast 500 Awards are given by Deloitte each year, based on percentage revenue growth over a five-year period. Interpeak's five-year growth was 1,978 percent compared to an average of 935 percent among all 500 companies.

In November 2005 Deloitte cited Interpeak as the second fastest-growing technology company in its Sweden Technology Fast 50 Awards. Established in 1995, the Deloitte Fast 50 ranks the 50 fastest-growing technology companies by geographic region. Winners of the regional Fast 50 programs are automatically eligible for the Fast 500 program in their area.

“Software's prevalence in this year's list of winners confirms that the software sector continues to thrive as it meets the demand created by the increased adoption of Internet technologies across the world,” said Johan Fornaeus, CEO of Interpeak. “We are extremely proud to join our fellow Fast 500 winners and look forward to another year of significant growth.”

About Interpeak

Interpeak provides state-of-the-art networking solutions specifically designed for embedded systems. Interpeak's products include various drop-in solutions for networking applications, such as gateways, network storage, edge routers, mobile phones, home access devices, wireless networks, digital media, and others. The company's embedded networking and security software is currently used in thousands of applications across the globe. Its customers span the telecommunications and data communications markets. Headquartered in Stockholm, Sweden, Interpeak operates through a global network of distribution channels and has its own sales and field application force dispersed in strategic locations worldwide, including the USA, Japan, and Europe.
